EXPERIENCE

Lake Bellevue Dental Care, Inc.

Business Operations Analyst (Full-time)

Bellevue, WA, USA

Jul 2025 – Present

- Monitored daily operational workflows for a multi-provider dental practice, coordinating scheduling, patient communication, and provider availability through Eaglesoft practice management software.
- Maintained and audited HIPAA-compliant records for 1,000+ active patients, improving data accuracy and reducing documentation inconsistencies across administrative systems.

Il Mulino Di Valenzano Bakery

Sales Data Analyst (Full-time)

Franklin Park, IL, USA

May 2024 – Jul 2025

- Built an Excel-based inventory tracking system for 50+ bakery SKUs, reducing daily reconciliation time from 45 minutes to 15 minutes and improving visibility into high-demand products during peak sales periods.
- Analyzed 14 months of QuickBooks sales data to identify revenue trends, revealing that weekend mornings generated 60–70% of weekly sales and supporting staffing and production planning decisions.

EMC Insurance Companies

Strategic Analyst Intern (Full-time)

Des Moines, IA, USA

May 2023 – Aug 2023

- Validated and reconciled insurance policy data for Michigan regulatory filings using Denodo SQL queries, identifying data discrepancies and supporting on-time quarterly compliance submissions.
- Developed SQL-based reporting workflows to automate compliance and product performance reporting, reducing manual report preparation time from 2 hours to 30 minutes.

Drake University ITS

Application Systems Analyst Student Technician (Part-time)

Des Moines, IA, USA

Jun 2022 – Sep 2023

- Supported deployment and maintenance of 300+ devices across 15 campus labs and administrative offices, standardizing imaging procedures and reducing setup time from 3 hours to 45 minutes per device.
- Collaborated with infrastructure and support teams to troubleshoot deployment issues, implement quality checks, and improve device configuration accuracy before end-user rollout.

Front Desk Student Technician (Part-time)

Mar 2021 – Sep 2023

- Resolved 100+ monthly technical support requests involving hardware, software, and network connectivity issues for students, faculty, and staff using TeamDynamix ticketing system.
- Performed software installation, device configuration, and system maintenance across Windows and Mac environments while documenting recurring issues to reduce repeat support requests.

RELATED PROJECTS

Predicting Layoff Patterns Based on Company Attributes

Jan 2024 – Mar 2024

- Analyzed layoff trends using machine learning models and company workforce data to identify patterns across industries, locations, and time periods.
- Evaluated multiple predictive models and selected a Decision Tree for its balanced training and testing performance in interpreting non-linear workforce trends, uncovering key business insights such as elevated layoffs in Q1 2023 and greater workforce impact in the Retail and Consumer sectors.

Consumer Demographics and Recommendations for Personal Skincare

Nov 2023 – Dec 2023

- Analyzed demographic and census data from 32K+ individuals using R to identify factors associated with high-income consumer segments for skincare market targeting.
- Applied statistical modeling and feature analysis techniques to support customer segmentation and improve understanding of purchasing demographics.
